Research interest: The Sociology of Knowledge; Cultural Sociology; Computational Sociology

BACKGROUND

Bachelor of Laws, Sociology, Zhejiang University, Hangzhou, China Sept,2019-Jun,2023

- Weighted Average Mark: 90.72/100; Comprehensive Score Ranking: 1/31
- Main Courses
 - Professional Basic Courses: Social Research Methods (93), Classical Sociological Theory (92), Modern Sociological Theory (94), Cultural Anthropology (98)
 - Specialized Courses: Applied Statistics (92), Social Statistics (95), Computational Sociology (97), Applied Statistical Software and Quantitative Analysis (99), Computational Content Analysis (99)
 - Interdisciplinary Courses: Behavioral Decision Making and Nudging (100), Ancient Western Philosophy (95), Early Modern Western Philosophy (94), Contemporary Western Epistemology (100)

RESEARCH EXPERIENCE

Attending the Annual Meeting of Chinese Sociology 2022 Aug,2022

- Project Name: *The Structure of Fertility Intentions of Urban and Rural Residents in China: Analysis Based on Causal Attitude Network*
- I used Causal Attitude Network (CAN), a novel tool developed based on the advancement of cognitive psychology, to analyze data from China Family Panel Studies (CFPS). What's unique about this study was that it introduced subjective variables to construct the structure of fertility intention of Chinese residents.

Completing the Graduation Project of Undergraduate Sept,2022-Jun,2023

- Project Name: *The Inconsistency in the Process of Modernization: A New Exploration of the Variations of Fertility Change in China*
- I adopted a perspective of anomy to explain how rapid development of Chinese society had impacted on its family norms by combining Causal Attitude Network (CAN) and Belief Network Analysis (BNA) to build key indices.

Serving as the PI of China's Super Rich Persons (CSRP) Project 2022 Jun,2022-Dec,2022

- I organized fellow students from universities like Zhejiang University, Nanjing University, and Shanghai University to improve the construction of the database.
- I verified and cleaned the collected data.

Participating in the Survey Project on Chinese Sociologists Jul,2022-Aug,2022

- I distributed questionnaires to major Chinese sociologists.
- I employed text analysis techniques to examine the traits of sociological publication based on content analysis of top sociological journals both domestically and internationally.

Serving as A Teaching Assistant for the Course *Computational Sociology* Sept,2022-Jan,2023

- I was responsible for the experimental part of this course. I taught students analysis techniques such as supervised and unsupervised machine learning models, network analysis methods and agent-based model and helped them with their course papers.
